Portfolio: nacholz.com | Upwork: Freelancer profile

Professional Summary

Full-stack engineer with 7+ years shipping production platforms end to end. Built a fintech investment platform managing $1.1M+ for 100+ investors and real-time tools used by 150+ field agents. Strong in React, TypeScript, Next.js, Node.js, PostgreSQL, Supabase and Google Cloud, with an AI-assisted workflow (Claude Code, Playwright E2E).

Work Experience

Upwork – Freelance Full-Stack Developer – Remote | 10/25 – Present

• Top Rated on Upwork (100% Job Success, 5.0★): production builds, audits and fixes for SaaS clients on Next.js, Supabase and Stripe.

• Built an interactive kiosk for a live art exhibition and shipped ~300 UI fixes and admin improvements on a booking marketplace (Next.js, NestJS, Supabase).

Zemobile – Senior Full-Stack Developer – Barcelona, Spain (Freelance, Remote) | 02/26 – 05/26

• Engineered and deployed a multi-brand SaaS via a zero-downtime Next.js/Supabase migration, integrating parallel-write PostgreSQL, end-to-end Stripe payments, strict RLS, and 30+ Make.com API workflows.

Alteox – Lead Software Engineer – Luxembourg (Full-time, Remote) | 11/25 – 02/26

• Led technical execution across multiple client-facing streaming platforms in a B2B OTT environment, bridging product, business, and engineering teams. Led the new corporate website and product landings (React, TypeScript, Strapi CMS).

• Coordinated frontend tasks and code reviews (Next.js, TypeScript) aligned with Figma, and supported backend debugging to stabilize production streaming environments.

BLOCK Capital – CTO & Co-Founder – Santiago, Chile & Valencia, Spain | 03/23 – 09/25

• Delivered first production version in under 6 months and attracted **100+ early adopters** and over **$1.1M USD** in managed investments.

• **Secured acceptance into Lanzadera accelerator**, validating technical architecture, strengthening growth and partnerships.

• Directed end-to-end development of a crypto investment platform, ensuring compliance with Chilean and Spanish financial regulations.

• Defined technical roadmap and supervised architecture across backend infrastructure and front-end delivery.

• Built responsive UIs with React.js and TailwindCSS, increasing mobile session time by 27%.

• Implemented full-stack environment with Remix.run/React Router, TypeScript, Node.js, PostgreSQL, Docker, and Google Cloud, reducing deployment time to under 5 minutes.

• Developed portfolio recommendation engine generating tailored investment options in <5 minutes.

• Represented BLOCK Capital at **Valencia Digital Summit 2024**, improving visibility in the European tech ecosystem.

Sireg Chile – Lead Software Engineer (Part-time, Freelance) – Santiago, Chile | 02/24 – 03/25

• Designed and launched mobile app + real-time control panel for municipal safety inspectors, adopted by **150+ field agents** in the first month.

• Led architecture and backend integration using TypeScript, Remix.run/React Router, TailwindCSS, Node.js, PostgreSQL, Docker, and Google Cloud.

• Provided a high-availability public safety platform enabling real-time tracking of operations, **reducing emergency response time by 33%**.

Envision Chile (Microsoft Partner) – Full-Stack Developer & Consultant – Santiago, Chile | 12/21 – 07/22

• Built enterprise-grade web apps with .NET Core (C#) and React.js, scaling tools to 100+ daily users.

• Gathered business requirements with cross-functional teams, delivering solutions reducing manual workflows by 50%.

• Migrated legacy systems to React component-based architecture, reducing maintenance time from weeks to days.

• Delivered proof-of-concept in under 3 weeks, securing client approval and project funding.

Price2Be – Front-End Lead – Santiago, Chile | 04/21 – 03/22

• Developed pricing recommendation system leveraging ML models for competitive benchmarking.

• **Won Best AI & Data Science Project** at USM Software Fair (selected among 100+ entries).

• Led front-end in React.js + TailwindCSS integrated with Python backend to deliver real-time insights with dashboards to visualize historical prices, sales patterns, and forecasts, guiding sellers in product positioning.

Projects

Educ.IA – AI Enrolment Platform on Web & WhatsApp (Side Project) – Valencia, Spain | 11/25 – 04/26

• Built a conversational AI platform for training centers: AI agents on web and WhatsApp for 24/7 student support and lead capture, a RAG knowledge base, and OCR document validation with Google Cloud Vision (React, Node.js, Supabase).

• **Selected for Lanzadera accelerator**, Spain's leading startup accelerator.

Education

Universidad Técnica Federico Santa María — **BSc in Computer Science** (Original Title: Ingeniero Civil Informático, intensive 6-year engineering degree)
Valparaíso, Chile | 2016 - 2023

Certificates

• Remix.js (React Full-Stack Framework) – The Practical Guide (Udemy, 2023)
• Front-End Web Development with React (Coursera, 2020)
• Neural Networks and Deep Learning (Coursera, 2021)
• Front-End Web UI Frameworks and Tools: Bootstrap 4 (Coursera, 2021)

Skills

Front-End: React.js, TypeScript, JavaScript (ES6+), TailwindCSS, Responsive Design, HTML5, CSS3, Remix.js, Next.js, Redux
Back-End: Node.js, PostgreSQL, Prisma, Supabase (RLS, Edge Functions), Stripe, Python, REST APIs, .NET Core, C#
Tools & Cloud: Docker, Git, CI/CD, Google Cloud, Vercel, Playwright, n8n, Make.com, AI Agents, RAG, Claude Code, Cursor
Practices: Agile/Scrum, System Architecture, Code Review, Technical Leadership

Languages

• **Spanish**: Native
• **English**: Professional Working Proficiency (C1)
